EDUCATION

University of North Carolina at Greensboro — Greensboro, NC

- **Master of Science in Computer Science** — Expected Dec 2027
  Data Science and Big Data track, Accelerated Master's Program | GPA: 3.81/4.00
- **Bachelor of Science in Computer Science** — Expected Dec 2026
  GPA: 3.87/4.00

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, Swift, SQL, C++, HTML/CSS
- **Frameworks & Libraries:** React, Redux, React Native, SwiftUI, Django, Django REST Framework, FastAPI, Spring Boot, Bootstrap
- **Data & AI:** pandas, NumPy, Jupyter, LLM APIs
- **Databases & Cloud:** PostgreSQL, MySQL, AWS S3, Docker, Heroku
- **Tools & Practices:** Git, GitHub, REST APIs, Figma, OOP, Data Structures, Algorithms

EXPERIENCE

Data Systems Analyst Intern — Apr 2026 – Aug 2026
UNCG Center for Youth, Family & Community Partnerships | Greensboro, NC

- Developed features for the NC Youth & Family Voices Amplified web app in a production Python/Django codebase, shipping changes through Git pull requests and code review.
- Designed the data models and built Bootstrap modal entry forms and a dashboard for a new Activity and Event Tracker, replacing a Microsoft Forms survey with an in-app tool.
- Diagnosed a production time-zone bug that shifted event times by 4 hours and recommended the fix that resolved it.

IT Technician — Sep 2022 – Jul 2023
Mercy Drive Inc. | New York, NY

- Administered Windows user accounts and access permissions for 45+ staff members.
- Led hardware and software deployments across multiple departments, keeping systems secure and reliable.
- Diagnosed and resolved hardware, software and network issues, including remote support over VPN across sites.

Web Development & SEO Intern — Apr 2020 – May 2020
Screenshop (acquired by Snap Inc.) | New York, NY

- Built responsive front-end interfaces with HTML, CSS, Bootstrap and JavaScript.
- Set up CI/CD deployment of new features to Heroku.
- Raised the site's on-page SEO score from 71% to 85% through structured optimizations.

PROJECTS

Ctrl + Ex + Delete | Senior Capstone — Fall 2026 – Present
Swift, SwiftUI, Python, FastAPI, PostgreSQL, AWS S3, LLM APIs

- Built the FastAPI backend and Ced, an LLM-powered AI companion chat with safety checks and in-chat crisis resources.
- Implemented real-time voice calls with Ced relayed through the backend, activity recommendations, progress insights and AWS S3 photo storage, plus the SwiftUI screens that use them.
- Kept users anonymous by design: no sign-up, with each install identified by an anonymous ID.

Carolina Explorer — Spring 2026
Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, Docker

- Co-developed a tour-booking web app where tourists search, book and review guided tours across North Carolina, and guides manage requests, earnings and ratings.
- Used a layered controller-service-repository architecture with BCrypt password hashing, CSRF protection and ownership checks on every booking action.

Hangman With Friends — Summer 2024
React, TypeScript, Django REST Framework, PostgreSQL

- Built an online hangman game where players write a custom word and share a link for friends to solve.
- Designed a write-only REST API that validates words and never exposes other players' answers.
